EXPERIENCE

University of Guelph

Door & On-Call Staff

Jan. 2024 – Apr. 2025

Guelph, ON

- Delivered front-line safety, security, and community support within residence facilities through scheduled rounds and on-call response
- Enforced housing policies, identified safety and maintenance concerns, and supported emergency response procedures
- Maintained accurate incident documentation and collaborated with Residence Assistants and campus support services

University of Guelph

Event Staff

Apr. 2025 – Present

Guelph, ON

- Supported varsity athletic competitions and large-scale university events through setup, operations, and tear-down. Coordinating with event managers, officials, and security personnel in fast-paced environments
- Provided customer support including ticket checking, access control, and guest assistance
- Performed ticket sales, managed concession transactions, and collected inventory and sales data to support event operations.

University of Guelph

Uni-Buddy Ambassador

Mar. 2024 – Sept. 2024

Guelph, ON

- Represented the university to prospective students via the Uni-Buddy online platform
- Responded to inquiries about academic programs, campus life, and student support services
- Provided timely and approachable guidance to assist informed decisions

PROJECTS

E-Commerce Analytics Dashboard

- Developed a full-stack e-commerce analytics web application using Spring Boot, React/TypeScript, and MariaDB, containerized with Docker Compose, that ingests raw retail transaction data from .csv or .xlsx files and runs an automated cleaning pipeline with real-time progress tracking
- Implemented RFM (Recency, Frequency, Monetary) analysis features including an interactive scatter plot and dual histograms (basket size and order value) with dynamic date and country filters, outlier detection, and export of cleaned data as .xlsx

Neuralinq Tutor

- Developed a full-stack intelligent tutoring system built with React and Flask that uses Google Gemini AI to dynamically generate personalized lessons, questions, and practice sets tailored to each student's mastery level.
- It features an adaptive learning algorithm that tracks student performance across skills and adjusts content difficulty in real time, alongside an admin panel for content management, AI-generated materials, and progress analytics.
