SUMMARY

Motivated Bachelor of Computing student at the University of Guelph with experience in customer service, event operations, and student outreach. Skilled in Data Analysis, Web Development, Python, Java, JavaScript, HTML, C, and Assembly, with strong problem-solving and teamwork abilities. Passionate about building practical, user-focused technical solutions.

WORK EXPERIENCE

Door & On-Call Staff, University of Guelph

Jan 2024 – Apr 2025

- Delivered front-line safety, security, and community support within residence facilities through scheduled rounds, on-call response, and controlled guest access.
- Enforced university housing policies, identified safety and maintenance concerns, and supported conflict resolution and emergency response procedures.
- Maintained accurate incident documentation and collaborated with Residence Assistants, Senior DOCS, and campus support services to ensure a safe, inclusive residential environment.

Event Staff, University of Guelph

Apr 2025 – Present

- Supported operational execution of varsity athletic competitions and large-scale university events, ensuring efficient setup, flow, and closure.
- Provided customer-facing support including ticketing, concessions, access control, and guest assistance while maintaining a professional event environment.
- Coordinated with event managers, officials, athletes, and security personnel to manage crowds and resolve issues in fast-paced, high-attendance settings.

Uni-Buddy Ambassador, University of Guelph

Mar 2024 – Sep 2024

- Represented the University of Guelph to prospective students through the Uni-Buddy digital engagement platform.
- Responded to inquiries regarding academic programs, campus life, and student support services while sharing first-hand experiences.
- Provided timely, accurate, and approachable guidance to assist students in making informed post-secondary decisions.

PROJECTS

Finance Manager

[Link to Demo](#)

Python/Django web application with SQLite for transaction tracking and user accounts. Implemented authentication, email verification, password reset, admin tools, and printable financial statements using Python, HTML, JavaScript, and CSS.

Investor Simulation

[Link to Demo](#)

Next.js 15 web application combining real-time market tracking with wealth projection. Features a Yahoo Finance API-powered dashboard, persistent paper-trading wallet, and a custom projection engine visualizing long-term compound growth in a responsive glassmorphism UI.

Neuralinq Tutor

[Link to Demo](#)

AI-powered adaptive learning platform built with React and Flask. Uses Google Gemini AI to generate personalized, context-aware lessons and practice questions based on learner mastery. Initial response may take up to one minute on first use.
